

Please amend the claims as follows:

B | 2. (Amended) The photographic photosensitive material according to claim 4, wherein said color correcting function is due to at least one of a colored coupler and an interimage effect.

3. (Amended) The photographic photosensitive material according to claim 4, wherein said sharpness enhancing function is due to a DIR coupler.

4. (Amended) A photographic photosensitive material which either has only one of or none of a color correcting function for carrying out color correction of an image which has been subjected to developing processing and a sharpness enhancing function for enhancing sharpness of the image which has been subjected to developing processing, wherein an identification code is recorded on said photographic photosensitive material, said identification code expressing that said photographic photosensitive material either has only one of or none of said color correcting function and said sharpness enhancing function, and wherein said identification code is recorded optically or magnetically onto said photographic photosensitive material, or is recorded onto a storage element provided at a cartridge accommodating said photographic photosensitive material.
